Subject: “Prompt ban of parallel exports”

Dear Ms Antoniou,

Our country goes through particularly crucial times and it is the duty of all of us to protect Public Health, and consequently, to ensure the access of Greek patients to all treatment schemes and medicinal products.

During the recent crucial hours, according to the information we obtain, conditions are formed in the market that favour parallel exports and may lead to substantial shortage. Consequently, in order to ensure by all means, the protection of Public Health, it is a direct priority and need to ban, for an indefinite period of time, parallel exports until the condition in the country is stabilized.

SFEE stands in favour of this fair and critical for the adequacy in the market request and we invite you to promptly issue, if possible during the day, the relevant order.

Yours sincerely,

Paschalis Apostolidis  Michael Chimonas
President of SFEE  General Manager
